

**LEI HEAVY DUTY
PLATE MOUNTING LEAD EDGE STRIPS
(Red Design – Double Flange)**

Up until now, no product was available that was strong enough to prevent lead edge failures.

We created a HEAVY DUTY LEAD EDGE STRIP designed to minimize the typical failures that are prevalent in the corrugated industry.

These failures may be caused by press crew handling, heavy pressure loads, jam-ups, or by the plate mounter.

The new triple strength strip prevents these failures and also produces a more rigid lead edge to the plate carrier.

LEI Heavy Duty Lead Edge Strips are sold in six foot and eight foot lengths, packaged 100 per box.

Red Design – Double Flange

Product	Part Number
6' (72") Red Heavy Duty J-Bar Lead Edge Strips	MT 3920
8' (96") Red Heavy Duty J-Bar Lead Edge Strips	MT 3930
